CJ NICKO B. ROSALES

Email: cjnickorosales@gmail.com

PROFESSIONAL SUMMARY

Computer Science student and full-stack developer who builds websites, applications and software, with experience in data handling, automation and AI-assisted development. Experienced in hackathons, team projects, leadership roles and technical organizations, including a 3rd Runner Up finish at the InterCICSkwela Hackathon 2026. Currently a Microsoft Student Ambassador and a mentee in the DysrupIT AI Labs, building on a foundation in back-end development, cloud technologies and SQL through hands-on projects, certifications and self-directed learning.

TECHNICAL SKILLS

- **Programming:** Java, Python, JavaScript, TypeScript, SQL, HTML, CSS
- **Frameworks & Libraries:** React, Next.js, React Native, Node.js, Flask, Electron, Tailwind CSS
- **Databases:** MySQL, PostgreSQL, Supabase, SQLite
- **Tools & Technologies:** Git, GitHub, VS Code, Postman, Figma, Docker, Linux, Vercel, Playwright
- **AI Tools:** ChatGPT, Claude, Copilot, Gemini, Ollama
- **Concepts:** Object-Oriented Programming, RESTful APIs, CRUD Operations, Database Design, Property-Based Testing

WORK AND LEADERSHIP EXPERIENCE

Mentee | 2026 - Present

DysrupIT, AI Labs (De La Salle Lipa)

- Mentee in the AI Labs of DysrupIT, an Australian tech company, at its De La Salle Lipa branch.
- Work on DysrupIT projects for mentees while learning from the AI Labs mentors through regular in-person sessions.

ITEQs Manager | 2026 - Present

DLSL Junior Philippines Computer Society (JPCS)

- Design, build, and maintain software applications to support the organization's projects and operations.
- Plan and manage JPCS events and projects, ensuring tasks are completed on time and meet organizational goals.
- Work with officers and committees to develop technical solutions and support chapter initiatives and events.

Devcon Volunteer | 2026 - Present

Devcon Manila

- Supported Devcon Manila community initiatives, including the “Code Smarter: Modern Software Development with AI” webinar.
- Assigned as a Backend Development Volunteer for some of the community's projects.
- Collaborated with developers and volunteers to build community-driven technology solutions.

Computer Science Program Coordinator | 2025 - 2026

DLSL Student Government - College of Information, Technology, and Engineering (CITE) Council

- Assisted Computer Science students with academic and administrative concerns.
- Helped organize and support events for the College of Information, Technology, and Engineering (CITE), including coordinating with student organizations and managing event logistics.
- Served as Event Head for the "ArduiEvolution" Arduino Workshop and Seminar, overseeing planning and ensuring the event ran smoothly.

Manpower Officer | 2022 - 2024

Red Cross Youth of Holy Trinity School of Padre Garcia, Batangas Inc.

- Assisted in organizing humanistic and charitable events
- Worked with peers and seniors on planning and execution of activities

Intelligence Officer | 2021-2022

Aerospace Cadets of the Philippines of Holy Trinity School of Padre Garcia, Batangas Inc.

- Assisted in supervised trainings for students.
- Collaborated with peers to develop cadet discipline and skills.
- Documented cadet information and helped deliver lectures and discussions

PROJECTS

BarkStudy *(Electron, React, TypeScript)*

- Built a Windows study app that schedules flashcard reviews with spaced repetition and escalates with an on-screen dog when reviews are skipped, always within an intensity cap set by the user.
- Wrote the behavior rules as a pure TypeScript engine, verifying eight safety invariants with exhaustive state exploration and property-based tests, and covered the app with Playwright tests.

Lokal.MD *(Python, Streamlit, Ollama, SQLite)*

- Built an offline clinical documentation and medication-safety workstation for rural health units at the AppBuildersPH Hackathon 2026, in a team of three.
- Transcribes Taglish speech with local Whisper, drafts SOAP notes with a local Ollama model, and checks contraindications, allergies and dosages with a deterministic rules engine, with clinician approval required and 94 passing tests.

VeriFund PH *(Next.js, TypeScript, Tailwind CSS, Vercel)*

- Developed a social aid distribution platform to cut ghost beneficiaries and duplicate claims, with a Citizen Portal and QR identity, a mobile-first Field Console and a Management dashboard.
- Built with a team of four for the Batang Techno · InterCICSkwela Hackathon 2026, finishing 3rd Runner Up, and deployed on Vercel.

CREDENTIALS AND CERTIFICATIONS

IBM Backend Development | 2026

IBM | Coursera

- Learned back-end development concepts, including RESTful APIs, server-side programming, databases, authentication, and version control with Git and GitHub.
- Built and tested back-end applications using Python, Flask, SQL, and NoSQL databases while applying CRUD operations and API development.
- Gained hands-on experience with web technologies and development tools, including Docker, Linux, and deploying back-end applications in a cloud environment.

Data Engineer Associate in SQL | 2026

DataCamp

- Learned SQL fundamentals, including querying, filtering, sorting, joins, subqueries, common table expressions (CTEs), and aggregate functions.
- Worked with relational databases to clean, transform, and analyze data using SQL while applying best practices for writing efficient queries.
- Gained experience in data engineering concepts such as data preparation, data transformation, and creating reusable SQL queries for reporting and analysis.

Microsoft Applied Skills: Get started with Azure management tasks | 2026

Microsoft Learn

- Completed hands-on Azure management tasks, including creating and managing Azure resources, resource groups, storage accounts, and virtual machines using the Azure portal.
- Applied basic Azure administration skills by managing subscriptions, resource providers, tags, and Azure AI Search resources.

Python (4 Star Silver Badge) | 2026

Hackerrank

- Demonstrated proficiency in Python by earning a 4 ★ Silver Badge through coding challenges focused on programming fundamentals and logical problem-solving.

DLSL Java Programming 1 | 2025

Codechum

- Learned the fundamentals of programming using Java, including variables, data types, control structures, methods, arrays, object-oriented programming, Java UI (Java Swing), and basic problem-solving

ACHIEVEMENTS AND PARTICIPATION

COMPETITIONS:

Pandesal.DEV Wackathon | 2026
Pandesal.DEV

Old St. Hackathon - C(OLD) (ST)ART | 2025
Old Star Labs

Collegiate Java Skills Competition | 2025
SIKAPTALA – National CS & IT Competition | DLSU-D

JPCS IT/CS Quiz Bee | 2025
1st Place – JPCS IQnnect 2025 | JPCS DLSL

GCash Ideathon | 2026
GCash

InterCICSkwela V2.0 Hackathon | 3rd Runner Up | 2026
CICS - SC Alangilan

AppBuildersPH Hackathon | 2026
App Builders PH

Hackathon Competition | 2026
SIKAPTALA – National CS & IT Competition | DLSU-D

National IT Skills Competition (Java) | 2025
Integrated Society of Information Technology Enthusiasts (ISITE) Inc.

EVENTS AND SEMINARS:

Connecting Innovators, Builders & Future Leaders | 2026
DysrupIT

ArduiEvolution | Event Head | 2026
DLSL Student Government - CITE Council

UpTech | 2025
Junior Philippine Computer Society - DLSL

Masterclass 101 | 2025
Junior Philippine Computer Society - DLSL

ACHIEVEMENTS:

DataCamp Scholarship | 2026
Data Engineering Philippines

First Semester 2nd Honor Awardee – Certificate of Recognition | 2024 - 2025
De La Salle Lipa

Microsoft Student Ambassador | 2026
Microsoft Student Ambassadors

DataCamp Scholarship | 2025
DLSL Junior Philippines Computer Society (JPCS)

Second Semester 3rd Honor Awardee – Certificate of Recognition | 2024 - 2025
De La Salle Lipa

ACADEMIC HISTORY

Holy Trinity School of Padre Garcia | 2018-2022
Highschool

De La Salle Lipa | 2024 - Current Year
College

Holy Trinity School of Padre Garcia | 2022 - 2024
Science, Technology, Engineering, and Mathematics
